

Matchstick Puzzles

1. Can you move 2 matchsticks to create 4 triangles of equal size?

2. Can you move three matchsticks to create 3 triangles of equal size?

Matchstick Puzzles

3. Can you move one matchstick to make this house face in the opposite direction?

4. In the picture below there are 7 triangles in total, 6 small and 1 big. Can you find them? Can you remove 3 matchsticks to leave 3 triangles which don't need to be equal in size?

Matchstick Puzzles

1. Can you move 4 matchsticks to make 11 squares? The squares do not have to be identical and the matchsticks do not need to be flat to the work surface.

2. There are 4 cubes in this picture. Can you move just one matchstick so that there are only 3?

Matchstick Puzzles

3. Can you remove 6 matchsticks to leave only 5 triangles?

4. Can you move 2 matchsticks to make this chair face to the left instead of to the right?
